Precision mandrels

Locate and drive from the bore

When a part has to be held on its bore, the mandrel sets the accuracy of everything machined after it. SHK supplies standard and customised mandrels for grinding, hobbing and balancing.

- Hydraulic oil and jelly mandrels
- Gear grinding mandrels and chucks
- Cylindrical grinding mandrels
- Gear hobbing mandrels
- CNC grinding mandrels
- Special balancing mandrels and customised mandrels
- Gauges for precision components

Grip expansion mandrels

Expanding mandrels that grip the bore along its length.

Balancing arbor with split collets

For holding components on balancing machines.

Collet chucks

Quick-change precision workholding

Quick-change collet chucks

Precision workholding systems with interchangeable collets for fast changeover between part sizes.

Collet chuck, inside diameter

Holds the component from its inside diameter.

Indexing and lever chucks

For valve bodies and fittings

Indexing chucks turn the part between operations on a lathe, so several faces can be turned in one clamping. They suit valve bodies, bonnets, fittings such as tees and elbows, yokes and spicer parts.

Lever chuck

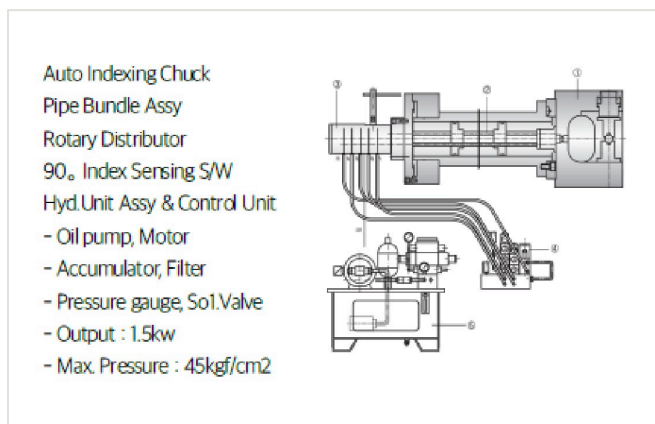

Semi-automatic indexing chuck

Auto indexing chuck

Auto indexing chuck

System and sizes

System components

- Auto indexing chuck and pipe bundle assembly
- Rotary distributor
- 90° index sensing switch
- Hydraulic unit and control unit: oil pump and motor, accumulator, filter, pressure gauge, solenoid valve
- Hydraulic unit output 1.5 kW, maximum pressure 45 kgf/cm²

Type	Max. workpiece D (mm)	Max. workpiece L (mm)
IDX-H225	60	100
IDX-H250	65	160
IDX-H280	80	220
IDX-H320	100	230
IDX-H350	135	240
IDX-H400	170	260
IDX-H500	220	310
IDX-H650	300	380

Typical workpieces: valve bodies and pipe fittings

Turning accessories

Products for productivity in turning

Chucks

Tool holders and clamping accessories

Bushes, sleeves and collets

To quote quickly, send us

- ☐ Component drawing with the clamping and locating diameters marked
- ☐ Machine: grinder, hobber, balancing machine or lathe, with spindle nose details
- ☐ Bore or diameter size and tolerance
- ☐ Required runout or accuracy
- ☐ Batch size and changeover frequency
- ☐ For indexing chucks: number of positions and part weight

Calibration, reconditioning and retrofit

How we work

From selection to support

01

Select

We review the part, the machine and the problem, and recommend the right product.

02

Supply

Equipment from established manufacturers, configured for your machine.

03

Install

Support with mounting, integration and first use on your shop floor.

04

Support

Service, spares and help when production needs change.

Start with the problem

Tell us what the machine or the part needs. We work back from the problem to the product, not the other way round.

One partner around the machine

Workholding, tooling, probing, chip and coolant handling, and machine services from one engineering team.

Established manufacturers

Products from specialist manufacturers, selected and supported locally from Bengaluru.

Talk to an engineer

Send a drawing, a photo of the machine or a short description of the problem. We will come back with the right solution.
