4. Enquiry and contact

Products by

OILMAX

Industrial waste management

Turn loose chips into dense briquettes

Loose chips and grinding dust take up space, carry coolant with them and cost money to store and move. A chip compactor presses them into solid briquettes that are easier to store, handle and sell.

Loose scrap before compaction, and compacted after

Features and benefits

- Rugged design with high compaction force
- Safety interlock for the door and overload protection for the motor
- Automatic hydraulic operation with a powerful stroke
- Great reduction in scrap volume
- Better space utilisation and scrap management
- Substantial reduction in scrap handling cost

VCC chip compactors

Specifications

Model	VCC 12-110	VCC 10-150
Briquette size	Ø100 × 50 mm	Ø75 × 50 mm
Hydraulic force	110 T	150 T
Electric motor	15 HP	15 HP
Cycle time	25 s	30 s
Machine size L × W × H (mm)	1700 × 1900 × 2350	1700 × 2000 × 2350

Materials: aluminium, MS, casting, hobbing and broaching burr, brass, copper and SS burr, and grinding dust.

Scrap and swarf compactor

Triple action, fully automatic

The triple-action, fully automatic scrap and swarf compactor presses loose, bulky material into compact bales.

Typical materials

- Spiral swarf
- Aluminium foil
- Aluminium strips
- Sheet metal
- Packing material
- Waste utensils

Chip and swarf compactor installations

To quote quickly, send us

- ☐ Material and chip type (or a photo of the chips)
- ☐ Chip or dust quantity per day
- ☐ Coolant content of the chips
- ☐ Required briquette or bale size, if any
- ☐ Space available near the machines

How we work

From selection to support

01**Select**

We review the part, the machine and the problem, and recommend the right product.

02**Supply**

Equipment from established manufacturers, configured for your machine.

03**Install**

Support with mounting, integration and first use on your shop floor.

04**Support**

Service, spares and help when production needs change.

Start with the problem

Tell us what the machine or the part needs. We work back from the problem to the product, not the other way round.

One partner around the machine

Workholding, tooling, probing, chip and coolant handling, and machine services from one engineering team.

Established manufacturers

Products from specialist manufacturers, selected and supported locally from Bengaluru.

Talk to an engineer

Send a drawing, a photo of the machine or a short description of the problem. We will come back with the right solution.
