

Product catalogue

CAM / Programming

SolidCAM, the complete CAM solution with i-Machining, fully integrated in SOLIDWORKS, for milling, turning and multi-axis machining.

In this catalogue

1. SolidCAM
2. Machining capabilities
3. Programming support
4. Enquiry and contact

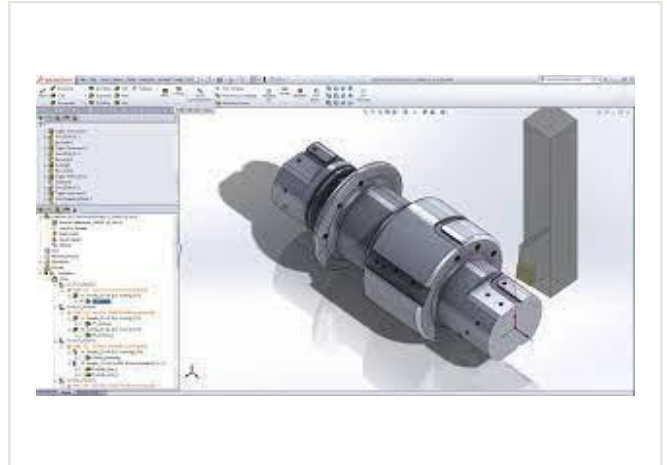

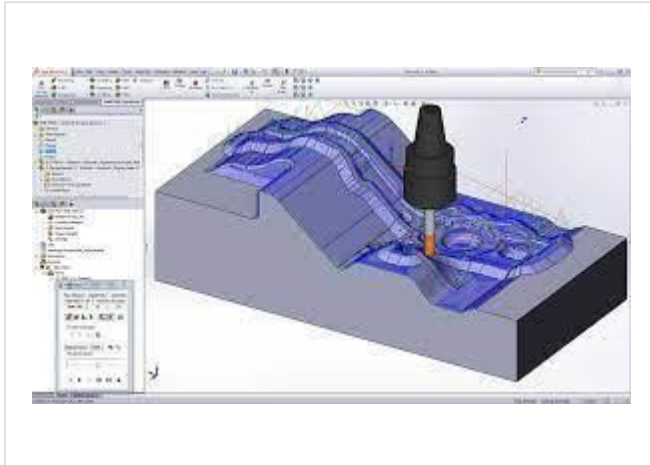

Software by

SOLIDCAM

SolidCAM

Program inside the CAD you design in

SolidCAM runs inside SOLIDWORKS, so toolpaths are created directly on the design model and stay associated with it when the design changes. Its i-Machining technology is built for fast, efficient milling.

Machining capabilities

From 2.5D to simultaneous 5-axis

- 2D and 3D machining
- 2.5D milling
- i-Machining for fast, efficient milling
- HSS: 3D high-speed surface machining
- HSR and HSM: 3D high-speed roughing and machining
- Indexial multi-axis milling
- Simultaneous 5-axis milling
- Turning and advanced mill-turn

Programming support

Help with the part, not just the software

Talk to SHK about CAM for your machines and parts: choosing the right modules, getting started, and support with programming for milling, turning and multi-axis work.

Works with the rest of the setup. Rotary tables, angle heads and probing all add capability that the CAM program has to use. SHK can look at the machine, the workholding and the programming together.

To quote quickly, send us

- ☐ Machines to be programmed, with their controls
- ☐ Type of work: milling, turning, mill-turn, 5-axis
- ☐ CAD system in use
- ☐ Typical parts (drawings or models)
- ☐ Number of programmers

Related SHK catalogues

Rotary & Tilting Tables

Rotary tables, tilting tables and support tailstocks

Custom Angle Heads

Heads configured around the application

Probing & Tool Breakage

Touch probes, tool setting and breakage detection

How we work

From selection to support

01

Select

We review the part, the machine and the problem, and recommend the right product.

02

Supply

Equipment from established manufacturers, configured for your machine.

03

Install

Support with mounting, integration and first use on your shop floor.

04

Support

Service, spares and help when production needs change.

Start with the problem

Tell us what the machine or the part needs. We work back from the problem to the product, not the other way round.

One partner around the machine

Workholding, tooling, probing, chip and coolant handling, and machine services from one engineering team.

Established manufacturers

Products from specialist manufacturers, selected and supported locally from Bengaluru.

Talk to an engineer

Send a drawing, a photo of the machine or a short description of the problem. We will come back with the right solution.
